

Rangsdorf – The history of the airfield in Rangsdorf

A big number of kept respectively still visible monuments belong to the former airport Rangsdorf. Architectural striking is undoubtedly the exemplary rehabilitated company estate in the Walther-Rathenau-street with the Bücker-villa, the aero-club-house as a part of the private grammar school (Seeschule) with the memorial to the 60.anniversary of the attempt on Hitler.

Unfortunately it didn't succeed to stop the dilapidation and the destruction of the listed area, especially of the Bücker Company, or to give them a new utilization. Hardly recognizable are the runway and the huts of the hard labourer in the landscape.

The Development association Bücker-aviation-museum e.V. succeeded in letting sporting planes start and land here on the listed airfield with international participation in the years 2000, 2001 and especially 2005 and in proving the peaceful character of the national and international aviation.
